

IFEN GmbH is a leading innovator in GNSS technologies, products and services. Due to strong market demands in the research, automotive and aerospace markets, IFEN is expanding its development team.

People are the key to our success. Therefore, we seek and retain talented, passionate individuals who are positioned to achieve job satisfaction in an open working atmosphere. IFEN GmbH offers competitive salaries, comprehensive benefits and an environment that supports creativity, open communication and teamwork. The successful candidate will work in a team of highly-skilled engineers in the 'Signal Innovations & Products' department to design and develop the next generation of GNSS RF software-defined receiver technologies and products.

Embedded Software-Engineer (f/m)

Bachelor, Master or Diploma degree in electrical engineering, information sciences or equivalent experience

Your Responsibilities

- Design, Development and Implementation of GNSS receiver signal processing algorithms on ARM platform
- Development of low-level drivers with real-time constraints
- Maintenance, enhancement and optimization of our 'NavApp' embedded SW on Linux-based ARM
- Profile and optimize critical code sections
- Integration and test of complete GNSS receiver platform

Your Skills

- More than 3 years of programming proficiency in embedded C/C++ on Linux platform
- Good knowledge of Linux-based development tool and tool chains on embedded platforms
- Knowledge in GNSS receiver signal processing (acquisition, tracking) and positioning software is a plus
- Knowledge in sensor fusion of GNSS with other sensors (inertial measurement units, barometer,..) is a plus
- Experience with configuration management, continuous integration and automated SW testing
- Very good written and spoken German and English language skills
- Ability to grasp and learn new concepts quickly and efficiently
- Capacity to approach challenges with a positive attitude and open mind as a team player
- Structured and quality driven working approach
