

NCS GNSS Signal Simulation & NOVA RF-SDR Generation Platform

IFEN GmbH is a leading innovator in GNSS technologies, products and services. Due to strong market demands in the research, automotive and aerospace markets, IFEN is expanding its development team.

People are the key to our success. Therefore, we seek and retain talented, passionate individuals who are positioned to achieve job satisfaction in an open working atmosphere. IFEN GmbH offers competitive salaries, comprehensive benefits and an environment that supports creativity, open communication and teamwork. The successful candidate will work in the 'GNSS Simulator' group to design next generation of 'NOVA' GNSS RF signal 'Software-Defined-Radio' software.

GNSS Signal Generation SW Engineer (f/m/d)

Bachelors, Masters or Diploma degree level in information sciences or equivalent experience.

Your Responsibilities

- Design, development and implementation of high-performance GNSS signal generation algorithms
- Algorithm and software development for next generation of NOVA signal generation Linux-OS platform
- Optimized implementation in C++/AVX on latest INTEL PC multi-core platforms
- Documentation from specification, architecture and design up to test definition and test reports
- Definition, design and implementation of unit and system tests

Your Skills

- Excellent knowledge in signal generation (GNSS baseband signals, interference...) algorithms
- Excellent knowledge in GNSS signal design (modulation, pulse shapes, coding types, multiplexing)
- Excellent programming skills in C/C++ (Linux)
- Good knowledge of SIMD/AVX software acceleration programming
- Preferable knowledge in CUDA software acceleration programming
- Experience with configuration management, continuous integration and automated SW testing
- Good written and spoken English and German language skills
- Ability to grasp and learn new concepts quickly and efficiently
- Structured and quality driven working approach
